

Tail lift seal 940-232

The Loading Systems tail lift seal 940-232 provide optimum protection of the tail lift opening.

Features

- Optimum aesthetic finish
- Excellent protection against dirt, draft and pests
- Made from high quality cloth
- Easy to install
- Available for each tail lift opening
- Available from stock

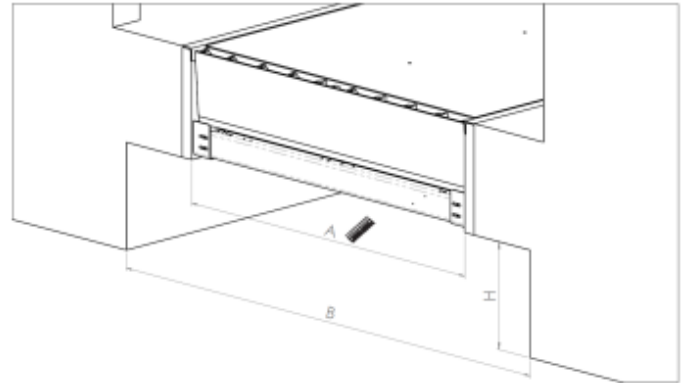

Application

The Loading Systems tail lift seal 940-232 protects the letterbox opening underneath the dock leveller against draft and litter. The seal also provides extra protection against pests.

Materials

The base of the tail lift seal is an anodised and extruded aluminium profile in which high quality 3000 gr/m² black curtain is attached. The tail lift seal can be optionally finished on the front with a reflective red trim.

The tail lift seal is supplied as a kit, including all fasteners and anchors which are needed to install the seal.

Dimensions

Each Loading Systems tail lift seal 940-232 is custom made. When ordering, please specify following dimensions:

- Overall width dock leveller A
- Width tail lift opening B (minimal 3000 mm)
- Height tail lift opening H (minimal 350 mm)
